

Introduction

Crimes take place in the society all over the world and has strong impact on the community. Syracuse, the place we are living in, has high rate of crimes but low chance of arrest. In this poster, I'll try to explore from Syracuse crime data to find key crime factors.

The results would help police departments to assign police resources more efficiently and help citizen to identify the crimes factors away from dangers.

The datasets were collected from Syracuse OpenData and US Census Bureau, which include all crimes cases

When do crimes happen more often?

Fact 1: Compare to the dark time, crime happens more during daytime!

Fact 2: Crimes happen more during summer and fall.
